## APPLICATION DEVELOPMENT & MAINTENANCE

Oneresolve Technologies ([www.oneresolve.com/](http://www.oneresolve.com/)) takes pride in providing its expertise in various areas of software development, deployment, and maintenance. Seamless integration with existing applications and quality-price equilibrium define the various innovative software services. Exploiting an array of technologies like UNIX, Windows, Oracle, DB2, SYBASE, MS SQL, Teradata; J2EE, .NET, VB, VC++, C, PHP, C++; IBM Websphere, BEA Web logic, etc its application services are as much diversified. They extremely include Custom Application Development, Application Enhancements, Re-Engineering of Existing Application, Migration of Legacy Application to Modern Technology Platforms and Web-enabling Legacy Applications. The Application Maintenance services effectively support requests like Technical Helpdesk Support, Fault analysis, Design update, Upgrades and Patches, Documentation maintenance, Code review, Service Level Agreements based support services, Application Support, 24x7 Support & Maintenance of application systems, besides, Maintainability Analysis.

<http://oneresolve.com/>

The company has grown exponentially to 600 employee's base of CRM deployment experience over seven years. Over 50 high-impact Customer Relationship Management (CRM) initiatives have already been implemented across a number of functional areas and industry verticals. Internally the CRM practice group of Oneresolve Technologies is organized into application groups which provide focused Siebel, Clarify and PeopleSoft CRM solutions. Our dynamic Enterprise Resource Solutions (ERP) with emphasis on best practices like ASAP for SAP R/3 Implementation and AIM for Oracle applications, JD Edwards' Active ERA, business process expertise, and commitment to quality as testified by our SEI-CMM Level 5 status, have made us the first choice among leading organizations around the globe.

We even provide complete business consulting and technical integration services to supply chain management (SCM). Not far from realization is the goal to develop algorithms and tools for the creation and maintenance of data warehouses. The Data Warehousing project is funded by Rome Laboratories and by the Advanced Research and Development Committee of the Community Management Staff as part of the Massive Digital Data Systems (MDDS) Program.

## BPO SERVICES

India has consistently seen a surge of foreign investments and long-term contracts through BPO industry. This has tremendously boosted Indian economy. The GDP has steadily risen from 1.2% to 5.4% as a result of the contribution of this industry. The following statistics downright make obvious the growth stimulated by the IT-BPO industry in the past decade:

- 1997-98: US\$ 4.8 billion
- 2006-07: US\$ 47.8 billion
- Current rate of growth is 28%
- Employment to be generated -1.6 million

The key drivers doing the trick for India are presence of skilled English-speaking workforce, quality control and cost-effectiveness.

Combining intelligent process management with state-of-art outsourcing management technology, today the Oneresolve ([www.oneresolve.com](http://www.oneresolve.com)) has emerged as India's leading client-centric off shoring Solutions Company. Its key strength lies in remote assistance for swift and complete solutions for all major brands including Microsoft, HP, Toshiba, DELL, Acer, Lenovo etc. At the same time, the confidentiality and integrity of the customer's data is maintained rigorously. Oneresolve is a leading provider of offshore BPO services. We deliver value to our customers by bringing operational excellence and deep industry and functional knowledge to their critical business processes. We provide high-quality execution of client processes, monitor these processes against multiple performance metrics, and seek to improve them on an ongoing basis. We serve several industries, including travel, financial services, insurance, technology, retail, logistics, utilities and professional services. In addition to industry-specific services, we offer a range of services across multiple industries, in areas such as finance and accounting; human resources; supply-chain management; market, business and financial research, and analytical services.

# Work Culture

<http://oneresolvetechologies.com/>

Human Capital is the most prized asset of Oneresolve Technologies. It takes utmost care to keep its human resources satisfied and motivated. The performance and resulting productivity is an indicator of the satisfaction level of its employees. Our ever-growing talent pool of professionals is less about hierarchies and more about contagious passion, energy and loyalty. Free exchange of ideas and innovative thinking noiselessly impact everything from routine office work to client communications, marketing buzz, product development, services distribution and strategic planning. Easy accessibility to the top line management including the CEO is another outstanding practice at Oneresolve Technologies.

Solid HR practices coordinate the acquisition, development and retention of diverse workforce. Regular in-house training programs for supervisors, line managers and future managers perk up the knowledge and energy level. Employee learning is a prioritized activity and employees feel more motivated as they participate in various online and classroom learning programs. The educational and professional development resources are provided in collaboration with different professional organizations of repute and recognition.

The importance of work-life balance is well-regarded at all levels. A harmonious and productive work atmosphere ensures growth, innovation and fun at workplace. Discount programs covering entertainment and food items are offered regularly to employees. Sporting events, referral rewards, creative brainstorming sessions, and management lectures from in-house and visiting experts- all stimulate the productivity and team spirit of the workforce.
